

Introducing The SSP APR Jumpstart

WHAT IF EVERY PIPELINE TOOL YOU NEEDED... ...CAME WITH YOUR GIS?

NOW THEY DO.

GET OFF 3RD-PARTY TOOLS FOREVER
WITH THE SSP APR JUMPSTART

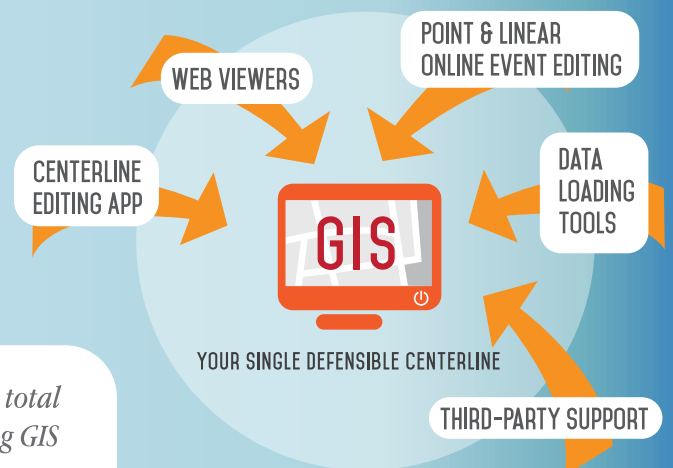

Overwhelmed by Data Tools?

Say goodbye to costly third-party software and support and annoying upsells. Now, all your transmission-pipeline tools reside within your Esri stack from the start. So you can manage pipeline data totally within your ArcGIS platform. And SSP is offering the only APR Jumpstart to show you how.

About the SSP APR Jumpstart.

With SSP, you get help building a safe, reliable, efficient technology environment. Our deep domain knowledge of pipeline practice, GIS and enterprise solutions, data modeling, and integrity management make us the resource operators go to for these answers and more.

“ SSP believes Esri's APR toolset is the best offer out there. APR tools reduce total cost of editing pipeline data with an intuitive feel from the world's leading GIS provider. This is a game changer. ”
— Clarke Wiley, SSP Director of Pipeline

What's Included?

- 1 **Fully Hosted** Sandbox or On-Premise Configuration
- 2 **Pipeline & Event Loading** to Core UPDM
- 3 **Linear Referenced** Network & Event Response Configuration
- 4 **APR** Extension Installation
- 5 **Named User Permission** Configuration
- 6 **ArcGIS** Pro Map Setup
- 7 **ArcGIS for Server Map** Publishing & Event Editing Setup
- 8 **On-Site** Training (Optional)

Why Use Esri APR Tools?

Eliminate the Cost of Redundant 3rd-Party Tools

Consolidate Modules Into Single APR Extension

Eliminate Non-Esri Support Needs

Leverage Your Full Esri Platform

Bring All Tasks, Workflows & Data Into Your Platform

Eliminate Version-Management Workarounds

Enjoy More User-Friendly Tools

Why SSP for Your APR Jumpstart?

SSP helped Esri refine the APR toolset. We know how to get the most from your Esri technology as well as the end goals of your pipeline operations. Few others in our space have the technical expertise and industry knowledge to help build your best data management.

“ Esri is pleased that SSP Innovations is focusing on helping pipeline operators better apply GIS to their increasing business challenges and opportunities, and that they've added Clarke Wiley to head their pipeline team. ”

— Tom Coolidge, Esri Pipeline and Gas Utility Industry Manager

Note: SSP can work with any data model you have, including: PODS Relational Pipeline, PODS Spatial, ArcGIS Pipeline Data Model (APDM), UPDM, or ArcGIS Gas Distribution Model.
