150,000

Miles of pipeline data managed by our team

100

Percent of projects that start on time

70+

Years of combined experience in pipeline data, integrity and more

40

Number of transmission operators our team has worked with

3

Number of Esri Partner Conference awards SSP has won

Meet SSP Director of Pipeline Clarke Wiley

Clarke Wiley has served pipeline operators, including Fortune 500 and Fortune 100 companies, for more than a decade. He leads the SSP Pipeline Practice by providing operators better enterprise solutions, data modeling and scalable GIS implementation.

“Esri is pleased that SSP Innovations is focusing on helping pipeline operators better apply GIS to their increasing business challenges and opportunities, and that they’ve added Clarke Wiley to head their pipeline team. Clarke possesses a broad range of expertise and experience that we’ve already seen him practically apply in customer settings.”

— Tom Coolidge, Esri Pipeline and Gas Utility Industry Manager

GIS PIPELINE PRACTICE WITH INTEGRITY

Your Pipeline GIS

Has a Lot of Questions to Answer.

Where exactly is my pipeline located?

What are the attributes for this line and where are the supplemental documents?

Where does UPDM come into play?

What data models are out there, and which best fit my organization?

What technology should I be on and how will new Esri technology affect me?

Does my data adequately feed my risk management program?

Answering these questions DOESN'T HAVE TO BE HARD.

With SSP, you get help building a safe, reliable, efficient technology environment. Our deep domain knowledge of pipeline practice, GIS and enterprise solutions, data modeling, and integrity management make us the resource operators go to for these answers and more.

What We Do →

STEP 1:

YOUR PLATFORM

SSP SETS UP YOUR TECHNOLOGY AND ARCHITECTURE, SO YOU CAN MODEL AND SHARE DATA SECURELY.

Your ArcGIS platform, pipeline referencing tools, web-event editing and hosted server environments

Your web viewers, deployment patterns, event editing and the downstream workflow management

Your Collector, Survey123 and other apps that standardize field work and reduce redundant labor

Your asset management, workforce management and nearly any other system for a single accurate information source

www.sspinnovations.com

STEP 2:

YOUR CENTERLINE & DATA

SSP BUILDS YOUR SINGLE, DEFENSIBLE VIEW OF YOUR CENTERLINE FOR INCREASED CONFIDENCE AND EFFICIENCY.

Your documents — scanned, matched and geo-rectified by experts who understand as-builts, designs and more

Your single accurate pipeline view of what's in the ground for faster decision making and accurate integrity analytics

STEP 3:

YOUR INTEGRITY MANAGEMENT

SSP HELPS YOU CLEARLY MONITOR RISKS, PERFORM MITIGATION ACTIVITIES, AND GENERATE REPORTS.

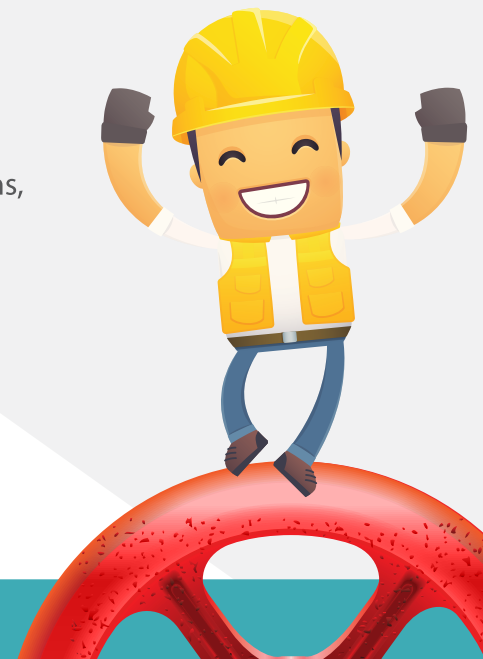

Your role-based web maps and dashboards accessible across any device

Your most reliable data modeling for refined calculations, both relative and probabilistic

Your historic snapshots of year-over-year changes, past MOAP/HCA calculations, risk inputs and more
